

Dear Reddit Team,

As a third year BSCS student seeking practical industry experience, I am applying for a software engineering internship at Reddit. My goal as an intern is to further my growth as a developer by helping to create software that solves intriguing problems and makes the world more user-friendly.

I have experience as a computer science teaching assistant and contributor to projects in open-source environments on Github. Coding, learning, teaching, and cultivating relationships with others towards a common goal is something I take pride in. I would love the opportunity at Reddit to be able to cultivate this passion.

I am confident that the skills I have gained makes me a quality candidate capable of excelling as a software engineering intern at Reddit.

Thank you for your time and consideration. I look forward to hearing back about this opportunity.

Sincerely,
John Tran
